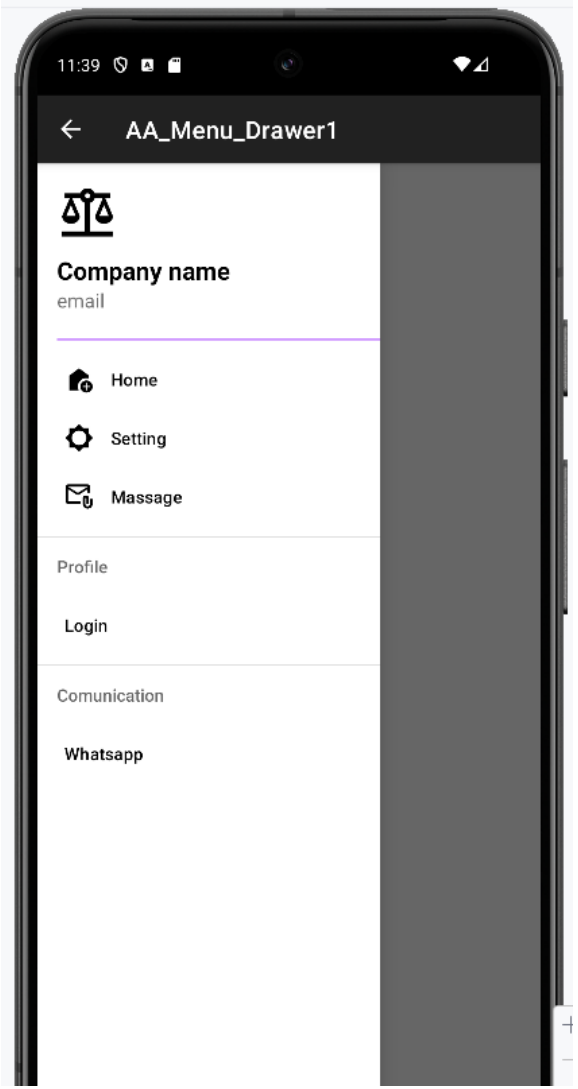
13. Drawer Menu

Android Studio

Android Navigation Drawer Menu Material Design

1. Add library to build.gradle
2. Add header resource file
3. Add menu folder
4. Add Icons
5. Add groups



Adding a dependency to the project

```
implementation 'com.google.android.material:material:1.3.0-alpha03‘
```

3 Sync Now Ignore these changes

Gradle Scripts

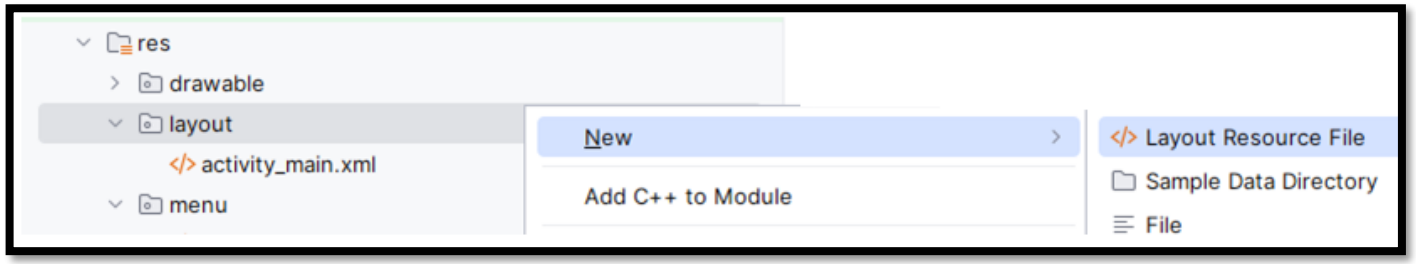
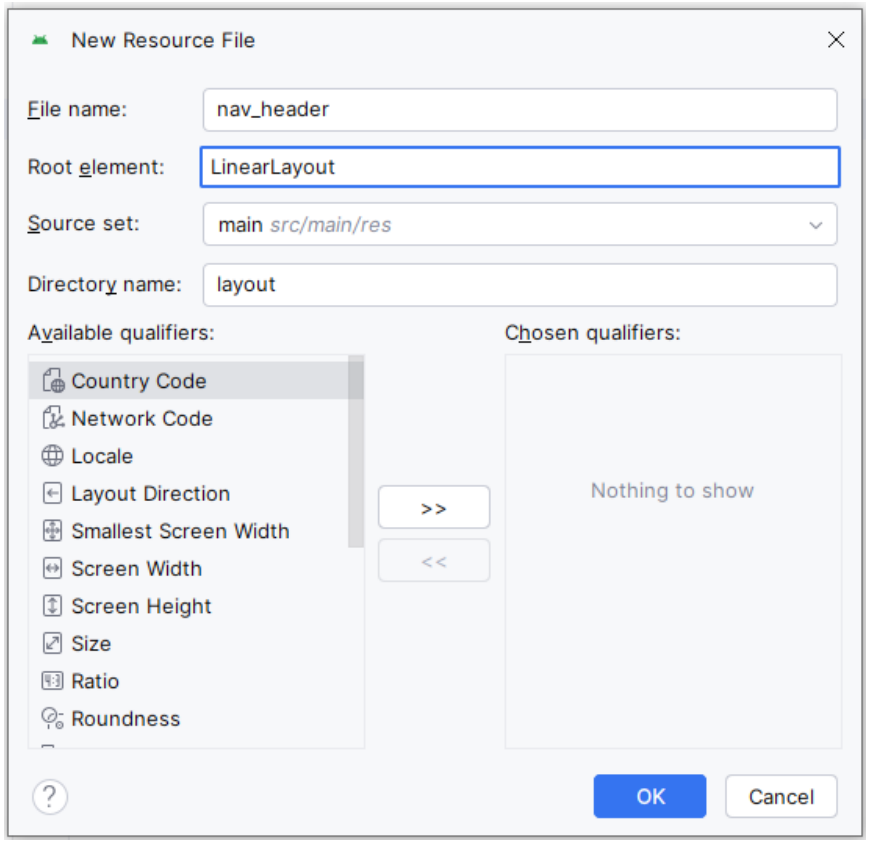
49  2   implementation("com.google.android.material:material:1.3.0-alpha03‘")
50  }
```

Add Header in Layout folder

- Write click on "**layout**"
- New → **Layout Resource File**
- File Name → **nav_header**
- Root element → LinearLayout
- **Press → OK**
- **Open nav_header then add the code next slie**





Add design to nav_header.xml

nav_header.xml

```xml
<LinearLayout xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:tools="http://schemas.android.com/tools"
    android:orientation="vertical"
    android:layout_width="match_parent"
    android:layout_height="match_parent">
    <ImageView
        android:id="@+id/imageView"
        android:layout_width="50dp"
        android:layout_height="50dp"
        tools:srcCompat="@tools:sample/avatars" />
    <TextView
        android:id="@+id/textView"
        android:layout_width="match_parent"
        android:layout_height="wrap_content"
        android:textSize="20dp"
        android:textColor="@color/black"
        android:paddingTop="8dp"
        android:textStyle="bold"
        android:text="Company name" />
    <TextView
        android:id="@+id/textView2"
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:textSize="16dp"
        android:text="email" />
    <View
        android:layout_width="match_parent"
        android:layout_height="2dp"
        android:layout_marginTop="20dp"
        android:background="#D099FF"/>
</LinearLayout>
```

Add menu folder to resource

- Write click on "**res**"
- New → **Android Resource Directory**
- Menu → **Ok**

Add new Icon to drawable folder

- Write click on “**drawable**”
- New → **Victor Asset**
- Clip Art → **Select Icon**
- Change: Name = **home_icon**
- Color = **Black**
- Press **Finish**
- **Add All Icons**

Before build the navigation menu file you should select all icons for menu:

nav_menu.xml

```xml
<?xml version="1.0" encoding="utf-8"?>
<menu xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:tools="http://schemas.android.com/tools"
    tools:showIn="nav_view">

    <item android:id="@+id/nav_home"
        android:icon="@drawable/home_icon"
        android:title="home" />

</menu>
```

nav_menu.xml

nav_menu.xml

```xml
<?xml version="1.0" encoding="utf-8"?>
<menu xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:tools="http://schemas.android.com/tools"
    tools:showIn="nav_view">

    <item android:id="@+id/nav_home"
        android:icon="@drawable/home_icon"
        android:title="Home" />
    <item android:id="@+id/nav_settings"
        android:icon="@drawable/setting_icon"
        android:title="Setting" />
    <item android:id="@+id/nav_massage"
        android:icon="@drawable/massage_icon"
        android:title="Massage" />

<item  android:title="Profile">
    <menu>
        <item android:id="@+id/nav_login"
            android:title="Login" />
    </menu>
</item>
<item android:title="Comunication" >
    <menu>
        <item android:id="@+id/nav_whatsapp"
            android:title="Whatsapp"/>
    </menu>
</item>
</menu>
```

Design activity_main

nav_header.xml activity_main.xml

```
<?xml version="1.0" encoding="utf-8"?>
<androidx.drawerlayout.widget.DrawerLayout
    xmlns:android="http://schemas.android.com/apk/res/android"
    xmlns:app="http://schemas.android.com/apk/res-auto"
    xmlns:tools="http://schemas.android.com/tools"
    android:id="@+id/drawerLayout"
    android:layout_width="match_parent"
    android:layout_height="match_parent"
    tools:context=".MainActivity">

    <androidx.constraintlayout.widget.ConstraintLayout
        android:layout_width="match_parent"
        android:layout_height="match_parent">

        <TextView
            android:layout_width="wrap_content"
            android:layout_height="wrap_content"
            android:text="Activity 1"
            android:textSize="30dp"
            app:layout_constraintBottom_toBottomOf="parent"
            app:layout_constraintEnd_toEndOf="parent"
            app:layout_constraintStart_toStartOf="parent"
            app:layout_constraintTop_toTopOf="parent" />
    </androidx.constraintlayout.widget.ConstraintLayout>

    <com.google.android.material.navigation.NavigationView
        android:layout_width="wrap_content"
        android:layout_height="match_parent"
        app:headerLayout="@layout/nav_header"
        app:menu="@menu/nav_menu"
        android:id="@+id/nav_veiw"
        android:fitsSystemWindows="true"
        android:layout_gravity="start"/>

</androidx.drawerlayout.widget.DrawerLayout>
```

Add open & close to strings file

MainActivity.kt strings.xml

Edit translations for all locales in the translations editor.

```
1  <resources>
2      <string name="app_name">AA_Menu_Drawer1</string>
3      <string name="open">Open</string>
4      <string name="close">Close</string>
5  </resources>
```

MainActivity.kt

```kotlin
import android.os.Bundle
import android.view.MenuItem
import android.widget.Toast
import androidx.activity.enableEdgeToEdge
import androidx.appcompat.app.ActionBarDrawerToggle
import androidx.appcompat.app.AppCompatActivity
import androidx.drawerlayout.widget.DrawerLayout
import com.google.android.material.navigation.NavigationView

2 Usages
class MainActivity : AppCompatActivity() {
    4 Usages
    lateinit var toggle: ActionBarDrawerToggle
    override fun onCreate(savedInstanceState: Bundle?) {
        super.onCreate(savedInstanceState)
        enableEdgeToEdge()
        setContentView(R.layout.activity_main)
       val drawerLayout : DrawerLayout = findViewById( id = R.id.drawerLayout)
       val navView : NavigationView = findViewById<NavigationView>( id = R.id.nav_view)

        toggle = ActionBarDrawerToggle( activity = this,drawerLayout, openDrawerContentDescRes = R.string.open, closeDrawerContentDescRes = R.string.close)
        drawerLayout.addDrawerListener( listener = toggle)
        toggle.syncState()
```

Continues …

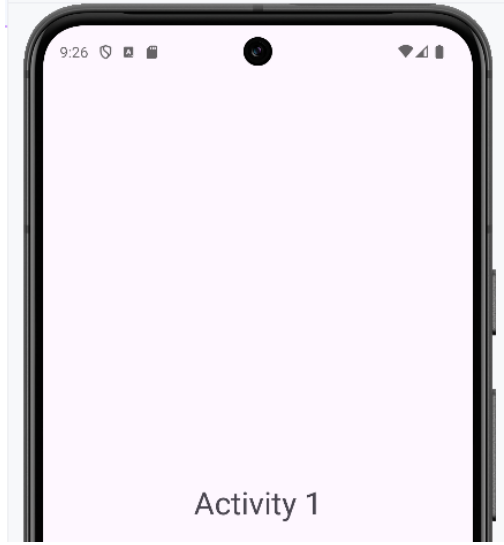
```
25          supportActionBar?.setDisplayHomeAsUpEnabled(true)
26          navView.setNavigationItemSelectedListener {
27              when(it.itemId){
28                  R.id.nav_home -> Toast.makeText( context = this,  text = "my home",  duration = Toast.LENGTH_SHORT).show()
29                  R.id.nav_settings -> Toast.makeText( context = this,  text = "my setting",  duration = Toast.LENGTH_SHORT).show()
30                  R.id.nav_login -> Toast.makeText( context = this,  text = "my login",  duration = Toast.LENGTH_SHORT).show()
31
32              }
33              true
34          }
35      }
36      override fun onOptionsItemSelected(item: MenuItem): Boolean {
37          if (toggle.onOptionsItemSelected(item)){
38              return true
39          }
40          return super.onOptionsItemSelected(item)
41      }
42  }
```

Themes file

MainActivity.kt themes.xml

```xml
<resources xmlns:tools="http://schemas.android.com/tools">
    <!-- Base application theme. -->
    <style name="Base.Theme.AA_Menu_Drawer1" parent="Theme.Material3.DayNight.NoActionBar">
        <!-- Customize your light theme here. -->
        <!-- <item name="colorPrimary">@color/my_light_primary</item> -->
    </style>

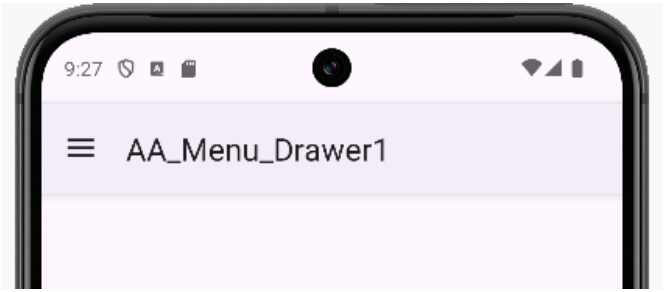
    <style name="Theme.AA_Menu_Drawer1" parent="Base.Theme.AA_Menu_Drawer1" />
</resources>
```



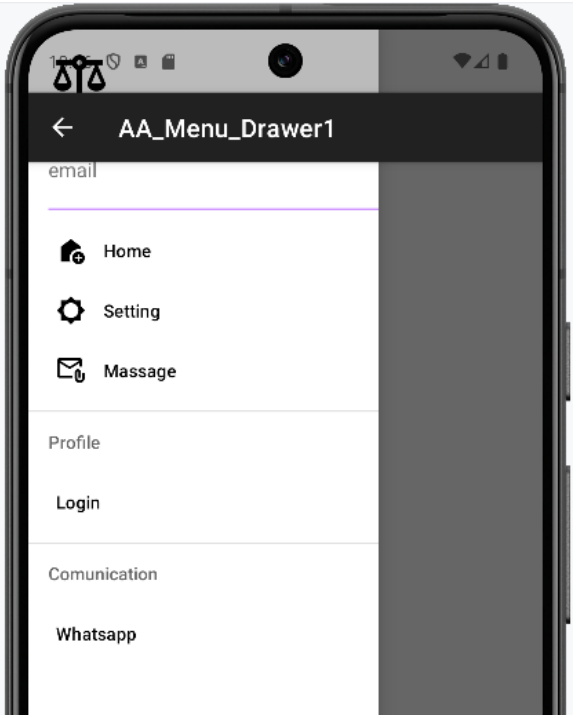
MainActivity.kt themes.xml

```xml
<resources xmlns:tools="http://schemas.android.com/tools">
    <!-- Base application theme. -->
    <style name="Base.Theme.AA_Menu_Drawer1" parent="Theme.Material3.DayNight">
        <!-- Customize your light theme here. -->
        <!-- <item name="colorPrimary">@color/my_light_primary</item> -->
    </style>

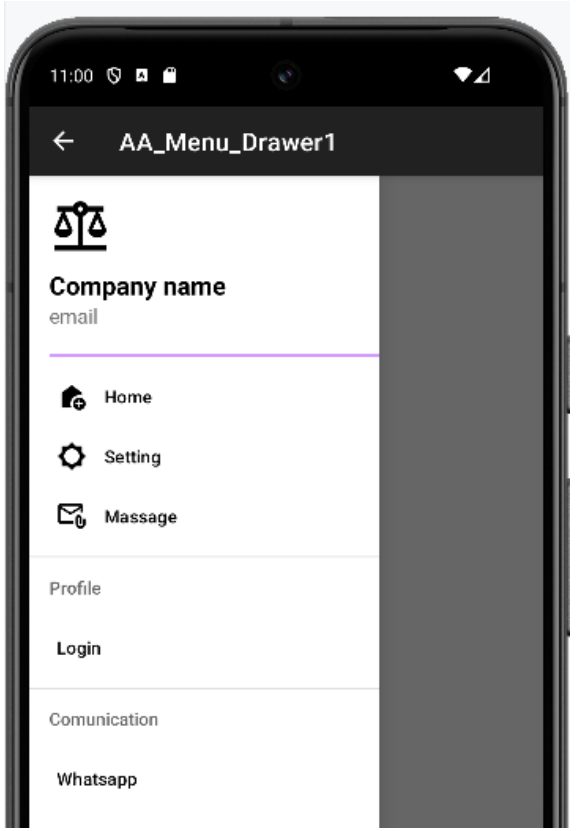
    <style name="Theme.AA_Menu_Drawer1" parent="Base.Theme.AA_Menu_Drawer1" />
</resources>
```



Test app



```
override fun onCreate(savedInstanceState: Bundle?) {
    super.onCreate(savedInstanceState)
    enableEdgeToEdge()
    setContentView(R.layout.activity_main)
    drawerLayout = findViewById( id = R.id.drawerLayout)
    val navView : NavigationView = findViewById<Navigatio
    toggle = ActionBarDrawerToggle( activity = this,drawerLa
```



Open LoginFragment inside MainActivity

1. Add new BlankFragment: LoginFragment

2. Change activity_main: add ContainerLayout (id=containerFragment)

```
    <androidx.fragment.app.FragmentContainerView
        android:layout_width="wrap_content"
        android:layout_height="wrap_content"
        android:id="@+id/containerFragment"
        android:textSize="30dp"
        app:layout_constraintBottom_toBottomOf="parent"
        app:layout_constraintEnd_toEndOf="parent"
        app:layout_constraintStart_toStartOf="parent"
        app:layout_constraintTop_toTopOf="parent" />
</androidx.constraintlayout.widget.ConstraintLayout>
```

3. Add these statement inside MainActivity

```
R.id.nav_login -> {
    supportFragmentManager.beginTransaction()
        .replace( containerViewId = R.id.containerFragment, fragment = LoginFragment())
        .commit()
}
```
